# THE PERFECT PARTNER FOR INSPIRED FACADES.

Uground - Bucharest

## Whatever your needs may be, Alpro offers professional support every step of the way.

The facade of a building should be more than a shell. It should consist of different technologies and materials in order to create an intelligent solution, which can offer both a pleasant look and remarkable performances. Alpro can offer products, expertise and support, which can turn even the boldest ideas into reality.

Alpro works in partnership with its clients offering planning, production solutions and installation expertise in order to create the optimal solution for each project. Whether it is steel, aluminium, glass or other materials Alpro will identify the most suitable material and adapt it to meet the requirements of the project. Produced on the Alpro production lines in Bucharest, Romania, the quality of the facades is guaranteed.

# FACADES THAT APPEAL, FACADES FOR SPECIALISTS.

Emporiki Bank - Bucharest

UPC - Bucharest

## The innovative and professional Alpro approach creates facades that catches the eye.

Alpro started its activity in 1995 as a designing company and brought a great number of innovations in the facades installation field. Shortly after in 1997 Alpro invested in production lines leading to the successful completion of numerous prestigious projects. In the years since Alpro has continued to grow and build its knowledge and skills. This knowledge and skills we gladly share with our Alpro customers.

# FROM IMAGINATION TO REALITY.

With Alpro as your partner,  
you will benefit from all it's capabilities.

Riversite Tower - Bucharest

Alpro supports its clients every step of the way from planning to installation. We work with the construction team to ensure coordinated planning and execution, taking responsibility at all stages. While understanding the importance of working to a program, we are team players with the ability to adapt to our clients requirements.

Challenging projects require a practical and imaginative approach. Alpro is inspired from a vast experience and numerous projects in order to find an efficient solution for every stage of a project, from the

beginning to the end and after the installation is complete.

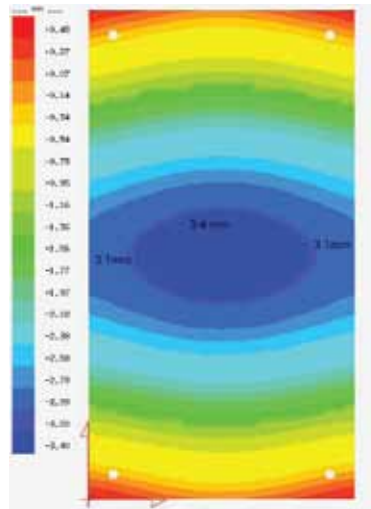

Also, Alpro makes available to its customers, through the Bucharest office, all the knowledge and competencies acquired by taking full responsibility for the solutions it offers. The highly qualified designers and assembly personnel can provide the full technical support necessary to deliver a wide range of projects as proven in countries such as Romania, Bulgaria, Italy and France.

# PRACTICALLY, EVERYTHING IS UNDER CONTROL.

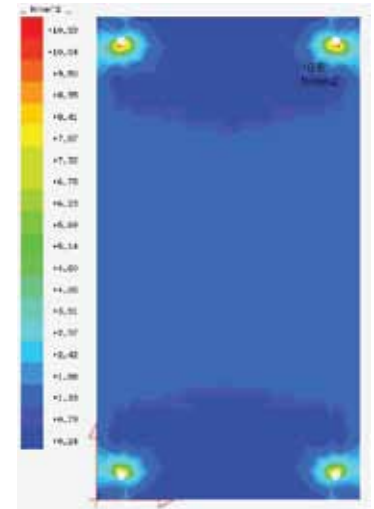

Let your inspiration free.

Thanks to the investments in high performance software, Alpro can verify and guarantee that every proposed project or model will meet the strictest requirements of our clients.

In addition, Alpro cooperates with specialised institutes and laboratories for various laboratory tests, which allows it to comply with every requirement quickly and reliably – and all this because we want to become a leader of the industry which really “builds new solutions”.

## Alpro Facades:

- Models adapted to your requirements
- Capable of satisfying the strictest designing requirements
- Technically innovative
- Optimised cost

Testing the thermal energy resistance of a facade by carrying out isothermal analysis.

# FOR EXCEPTIONAL RESULTS, YOU NEED AN EXCEPTIONAL PARTNER.

Alpro factory in Bucharest, Romania, ensures that every solution, be they system solutions or solutions adapted to the facade, are created to the highest standards in the shortest possible time. The purchase department, in close cooperation with the supply companies, sources

materials and accessories of the highest quality. To our clients, Alpro provides exceptional solutions, competitive prices and remarkable performances regardless of size or complexity of the project.

# WE ACHIEVE GOALS BEYOND YOUR EXPECTATIONS.

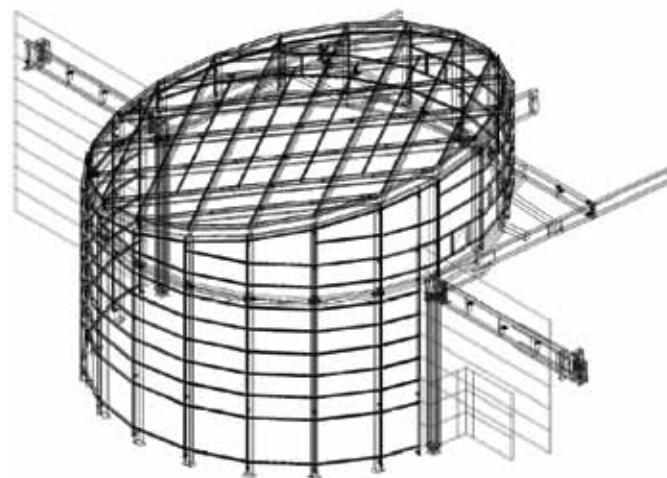

Alpro – quality at every stage.

CORA Hypermarket - Bucharest

To Alpro, quality is of paramount importance. The Company is certified EN ISO 9001 for the quality management system, which entails a regular control of the processes and constant review for the improvement and preservation of the quality standards.

The Alpro approach is always a professional one in the preparation of a project and guarantees that every stage of the process is carefully controlled; from the beginning to closing of the contract. Each time, the result is an impressive and attractive facade.

3D representation for a complex facade project.

# FIRST CLASS FACADES, PROFESSIONAL DELIVERY AND INSTALLATION.

## Expertise for your facade project.

- Highly trained professionals
- Our own personnel on site
- A well established network of suppliers and cooperators
- A large variety of special equipment
- Complying with the strictest safety standards

Upground - Bucharest

## The highest installation standards.

Alpro insists upon combining high quality products, with efficient installation procedures. With the experience of the personnel the company, which is CE certified by IFT Rosenheim, is able to commit to any project, however big or complex.

## Alpro Service: the key to success in managing facade projects.

Alpro expertise extends beyond creating impressive facades to include a professional maintenance service. Alpro specialists can manage your facade, repairs and renovations, either for the facade of a single building or for every building in your portfolio.

# Remarkable in every way.

The management system employed by Alpro ensures the operational efficiency without compromising the safety of the environment.

For a company such as Alpro consideration of the environment is essential. The company therefore sources materials and products from appropriate suppliers. Alpro also works according to a management program which aims at reducing the emissions of noxious substances and energy consumption. Alpro's future growth is planned to occur in such a way it has a minimum impact on the environment.

## Safety – our maximum priority.

Since Alpro acknowledges its responsibility regarding the safety of its employees and clients, it pays a lot of attention to the health and work safety of all involved. The company's safety management ensures the maximum protection against accidents and other health risks, both in the factory as well as on site. We embrace all European requirements whether generic to the EU or specific to a particular country.

The Alpro quality management system includes EN ISO 9001 and CE Certification of IFT Rosenheim, Germany. This system will continue to develop with the purpose of meeting the requirements and specifications of our customers.
